

Troubleshoot Speak When Key Is Pressed

Prerequisites:

- 1 – Have access to the computer (not necessarily physical access)

Instructions To Troubleshoot Speak When Key Is Pressed:

- 1 – Log into the computer using your credentials, this should give you admin access
- 2 – Click on the  in the top-left hand corner, and then click on “System Preferences...”
- 3 – Click on  and then click on “Text to Speech” on the top bar
- 4 – Make sure “Announce when alerts are displayed”, “Announce when an application requires your attention”, and “Speak selected text when the key is pressed” is unchecked
- 5 – You can now close the System Preferences, and everything should be working how it is supposed to be; however if you have any more problems, you can contact the Help Desk at ext. 4357
