

SD92 iPad Information

Apple Account Information:

- There are 3 types of Apple Accounts (in our district): District Level, School Level, and Class Level
 - o District Level: Apps appropriate for the entire district are on this account, and we (the tech Department) manage them. This account also allows us to track the iPads
 - o School Level: Apps appropriate for just 1 school will belong to this account. The principals will have the details for this account, and be able to purchase apps for the entire school on this account
 - o Class Level: Apps appropriate for 1 classroom will belong to this account. These accounts will be created as needed (and requested), and the teachers will be given the credentials as needed.
- If you are using a district iPad **NOT** in a classroom setting, you may also use your personal Apple Account. If you don't have one, you can create one without a credit card by following the instructions here:
